The Barcelona Institute of Economics (IEB) is pleased to announce its I Summer School on Public Economics, entitled 'Evaluation of the effectiveness and efficiency of public policies', which will consist of two courses: one on 'Evaluation of Public Policies' and another one on 'Efficiency Analysis in the Public Sector'. The objective of each course is twofold. The first one is to offer an intensive training programme for PhD students on Public Economics, which will include computer sessions. The second objective is to provide young scholars with the opportunity to discuss their own ongoing applied research in public organizations with leading researchers in the field in a relaxed and open atmosphere. To accomplish this purpose, the students will have the opportunity to present their applied research work at sessions attended both by the invited lecturers and by IEB researchers.
